

Hydrolubric® 123-B

DESCRIPTION

Hydrolubric 123-B is a synthetic water additive specifically designed to meet the needs of central water systems using reciprocating plunger, multi-stage centrifugal or multi-stage gear pumps. **Hydrolubric 123-B** is normally used at a concentration of 2% - 5%. When used as recommended, **Hydrolubric 123-B** is readily dispersible in water and will provide lubricating and rust preventive characteristics to metal surfaces.

Hydrolubric 123-B is completely compatible with conventional soluble oils, and being a soluble synthetic, **Hydrolubric 123-B** solutions are also compatible with industrial ethylene and propylene glycol, as well as commercial permanent anti-freeze.

Hydrolubric 123-B is biodegradable and offers advantages in handling and disposal.

FEATURES / BENEFITS

- At the recommended concentration the polar synthetic components in the product provides a film on metal surfaces that effectively reduces friction and provides protection against aqueous corrosion
- Product contains no oil and is biodegradable which offers advantages in handling and disposal
- Product is completely compatible with conventional diluted soluble oils for ease of conversion
- Product is compatible with industrial glycols and commercial antifreeze which allows the product to be used in cold weather applications
- Concentration can easily be determined by refractometer. Refractometer factor is 3.5.

DATA (TYPICAL VALUES)

	Hydrolubric 123-B concentrate	5% Hydrolubric® 123-B In water
Appearance	Dark blue	Clear blue
Viscosity @100°F, SUS	Mobile fluid	32
Specific Gravity @ 60°F	1.016	1.000
pH	10.0	9.1
Pour Point, °F	34	32
Freeze Point, °F	29	32
Flash Point	N/A	N/A
Fire Point	N/A	N/A
